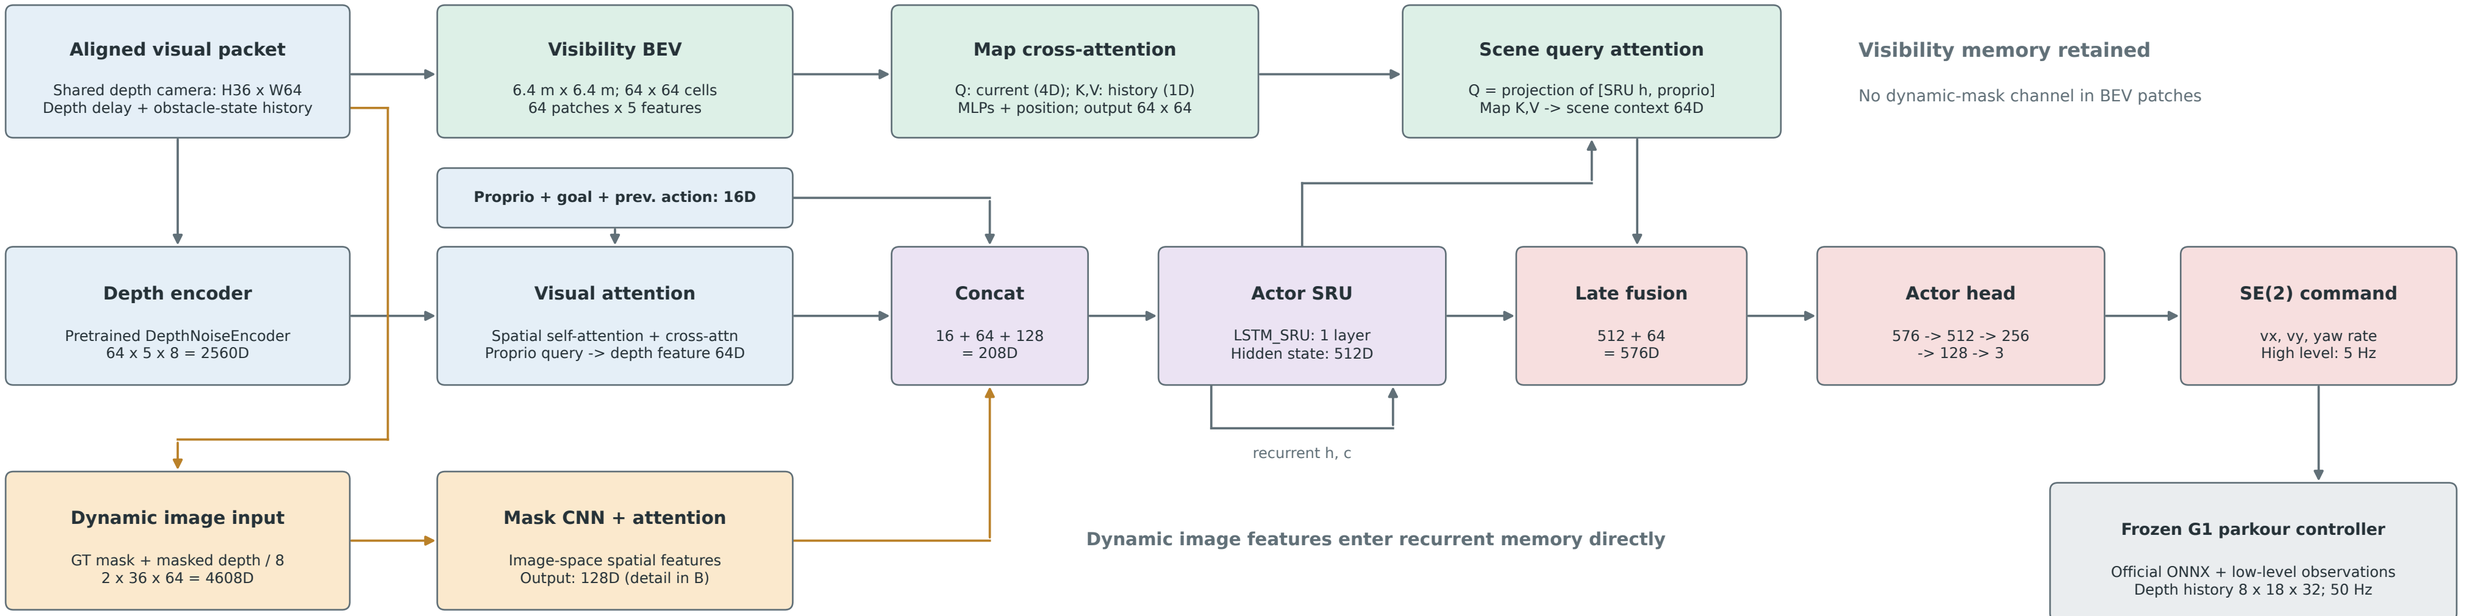
InstinctNav | MaskCNN + Visibility SRU

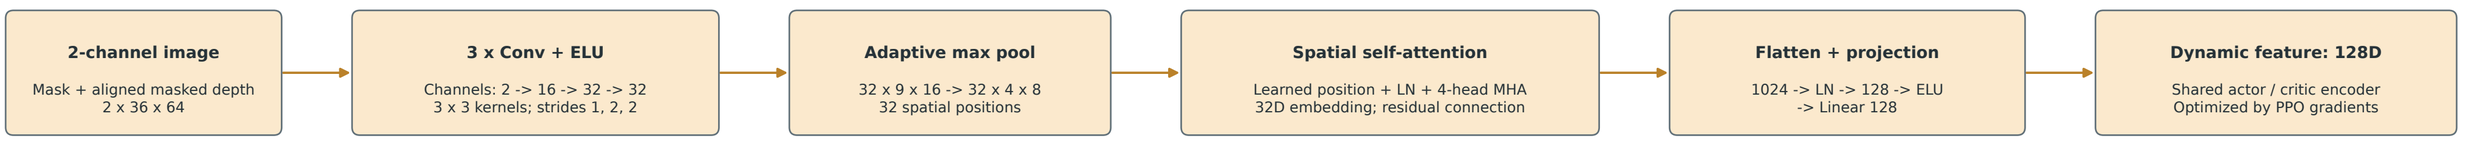
Current MaskCNN task / 2026-09-09

A ACTOR AND FROZEN CONTROL



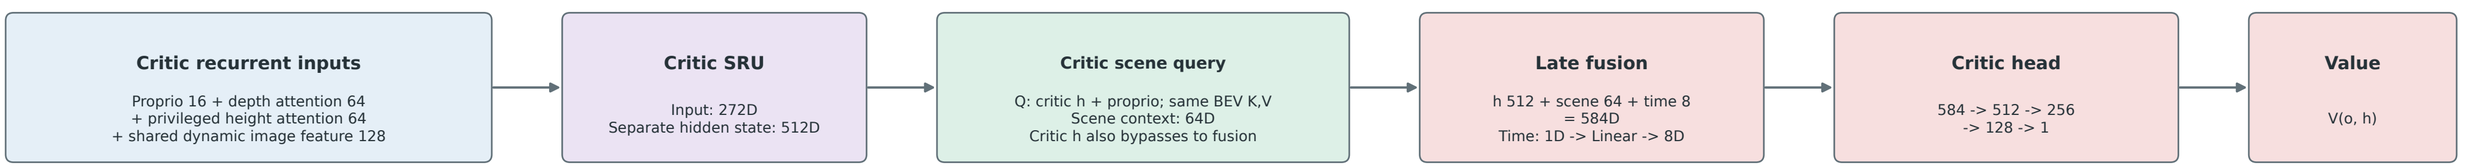
Training: environment GT + segmentation perturbations; no mask prediction loss.

B SHARED DYNAMIC IMAGE ENCODER



Spatial positions are preserved through CNN and attention before 128D compression; this is not dynamic BEV-token pooling.

C ASYMMETRIC CRITIC | TRAINING ONLY



Flat observations: actor 7504D = 16 + 2560 + 320 + 4608; critic 10641D = actor + height 3136 + time 1.

BEV patch: [history score, current hit, current depth, current edge, visibility delta]. Heads use ELU and fusion dropout (p = 0.2).
